Theme: Reading App

Abstract / Summary

The project is based upon the idea of using images combined with text or other visual information to express different ideas. It helps people in learning information and enhance their vocabulary. Moreover, comics often appeal to readers who find other material too challenging or uninteresting. Children can learn a lot about identifying emotions through the images in a comic and it will give a huge self-esteem booster and leads to kids naturally wanting to read more. Thus, such type of applications helps in bringing art education into the classroom.

Functional requirements and Architectural analysis
